SUMMARY

Full-Stack Developer with experience across telecom, banking, and software environments. Built Laravel/React applications and Python APIs in professional roles, alongside ASP.NET Core/Next.js and React Native projects. Hands-on experience with REST APIs, token-based authentication, role-based access control, real-time updates, and MySQL/PostgreSQL database design.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern — Touch Lebanon *Aug 2025 – Sep 2025*

- Developed a modular CMS with a Laravel API backend and React frontend, including Super Admin, Business Admin, and User dashboards with Laravel Sanctum authentication.
- Resolved CSRF/XSRF configuration issues and adjusted Nginx settings to stabilize backend–frontend communication and authentication.
- Built reusable React UI components and interactive dashboard modules for real-time activity tracking and KPI metrics.

Backend Developer — XpertBot (Remote) *Oct 2024 – Mar 2025*

- Developed Laravel/PHP backend services with MySQL data models and REST API endpoints for JSON data exchange.
- Implemented authentication and role-based authorization workflows to control user access to application functionality.
- Used Git and GitHub workflows to version backend code and manage changes.

Software Developer — Ciatek IT & Software Solutions *May 2024 – Aug 2024*

- Developed REST APIs with Python and Django Ninja to synchronize WooCommerce data with internal systems.
- Delivered a responsive web application using React.js, Vite, TypeScript, and Tailwind CSS.
- Implemented structured error handling and logging to track API activity and support diagnosis of application failures.

IT Operations Analyst — Bank Audi, Lebanon *Oct 2023 – May 2024*

- Provided end-user and infrastructure support, troubleshooting hardware and software incidents to restore service and support operational uptime.
- Administered enterprise IT infrastructure and secure remote access environments using FortiSIEM, PuTTY, and Active Directory.

PROJECTS

CommuTech — Civic Issue Reporting Platform | Final Year Project | GitHub Repo
Laravel 12 | React Native (Expo) | PostgreSQL/PostGIS | Pusher WebSockets

- Built a full-stack civic platform connecting citizens, field personnel, and municipal administrators for real-time issue tracking.
- Implemented municipality detection using PostGIS ST_Contains spatial queries and live map updates through Pusher WebSockets.
- Integrated role-based workflows, in-app messaging, and public status pages with QR-code issue lookup.

InventStock — Inventory Management System | GitHub Repo
ASP.NET Core Web API | Next.js | TypeScript | PostgreSQL | SignalR | JWT

- Designed and built a full-stack inventory application with ASP.NET Core Web API, Next.js App Router, and PostgreSQL, modeling parts, suppliers, and stock movements in a normalized relational schema.
- Built a signed-quantity stock ledger for incoming, outgoing, and adjustment movements; calculated stock levels with one aggregate query while retaining an audit trail identifying the user behind each movement.
- Secured real-time stock updates with SignalR and JWT, enforcing authorization at the hub-method level to prevent staff from invoking administrator-only operations.

EDUCATION

Bachelor of Technology in Computer Science (BTCS) | May 2026
Antonine University (UA), Baabda, Lebanon

TECHNICAL SKILLS

Backend: PHP, Laravel, C#, ASP.NET Core (MVC & Web API), Python, Django Ninja, REST APIs
Frontend: React.js, React Native, Next.js, TypeScript, JavaScript, Tailwind CSS, Vite, HTML5/CSS3
Databases: MySQL, PostgreSQL, PostGIS, PL/SQL, ER modeling
Authentication & Real-Time: Laravel Sanctum, JWT, role-based access control, SignalR, Pusher
Tools & Infrastructure: Git, GitHub, AWS, Nginx, Postman, Vercel, FortiSIEM, PuTTY, Active Directory

CERTIFICATIONS & LANGUAGES

Certifications: AWS Certified Cloud Practitioner; Google Foundations of Cybersecurity; Meta Intro to Front-End Development
Languages: Arabic (Native), English (Fluent), French (Intermediate)
