Mohamad Moumneh
Backend Developer
+(961)81809597||mmoumneh14@gmail.com||LinkedIn||Lebanon,Beirut

Motivated senior Computer Science student with a strong foundation in backend development. Seeking opportunities in backend or full-stack development to apply my skills in building efficient and scalable systems.

PROFESSIONAL EXPERIENCE

Backend Development, XpertBot(Remote) **Oct 2024 –March 2025**

- Developed backend systems using Laravel and PHP, designing models and API controllers for efficient communication.
- Utilized Git and GitHub for version control, collaborating with the team to manage code changes and follow best practices.
- Contributed to the Pharmacy Project, assisting patients with medication orders, healthcare contact, and patient history tracking, while ensuring smooth data exchange using MySQL and JSON.
- Collaborated with frontend developers to optimize backend performance, implement security best practices (user authentication/authorization), and ensure application functionality.

Software Development, Ciatek IT & Software Solutions, Beirut **May 2024 –August 2024**

- Led the development of a RESTful API using Python, Django, and Ninja, integrating with in-house systems and WooCommerce.
- Collaborated with cross-functional teams to gather requirements, design endpoints, and ensure seamless data synchronization.
- Built a responsive web application with React.js, Vite, TypeScript, and Tailwind CSS, following modern frontend practices.
- Implemented error handling, logging, and resolved technical challenges related to API integration and frontend performance.

IT Internship, Bank Audi, Beirut, Lebanon **Oct 2023 – May 2024**

- Provided technical support, resolved hardware/software issues, and ensured smooth IT operations and system stability.
- Monitored, optimized system performance, strengthened cybersecurity, and managed remote access using tools like FortiSIEM and PuTTY.
- Managed IT infrastructure, optimized user devices, and maintained system reliability through proactive support and Active Directory expertise.

Projects

- Developed a robust web-based delivery app system using Laravel, enabling seamless client-driver connections, real-time order tracking, and multiple payment methods including cryptocurrency. Integrated features like push notifications, live chat, and an admin panel for efficient order management and driver oversight.
- Developed a mobile app that enables customers to order medicines, check prices, and locate nearby pharmacies with ease. The admin panel allows stock management, product updates, and seamless control over the inventory.

Education

Antonine University (UA) | Baabda, Lebanon **Date of graduation May 2026**

- Bachelor Degree in Computer Science

Certification

- Introduction to Front-End Development (Meta).
- Java Programming: Solving Problems with Software (Duke University).
- Foundations of Cybersecurity (Google).
- AWS Certified Cloud Practitioner (CLF-C01) - Hands On (Amazon Web Services).

Skills

Programming Languages & Backend Development: PHP/Laravel, Python, Java, JavaFX, C++, Django, Ninja, RESTful APIs, JSON, Postman
Frontend Development & UX/UI Design: React.js, Vite, Tailwind CSS, HTML, CSS, JavaScript
Databases & Version Control: MySQL, PL/SQL, TablePlus, Entity-Relationship Models, Git, GitHub, Version Control Best Practices
