SUMMARY

Full-Stack Developer with hands-on experience across the telecom, banking, and software sectors, building secure RESTful APIs and real-time systems with Laravel/React and ASP.NET Core/Next.js. Skilled in token-based authentication, role-based access control, WebSocket integrations, and relational database design across MySQL and PostgreSQL.

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern — Touch Lebanon *Aug 2025 – Sep 2025*

- Developed a modular CMS featuring a Laravel API backend and React frontend, incorporating multi-role dashboards (Super Admin, Business Admin, User) and Laravel Sanctum authentication.
- Resolved CSRF/XSRF configuration issues and refined Nginx settings to stabilize backend–frontend communication and authentication reliability.
- Built reusable React UI components and interactive dashboard modules for real-time activity tracking and KPI metrics.

Backend Developer — XpertBot (Remote) *Oct 2024 – Mar 2025*

- Developed backend services with Laravel, PHP, and MySQL, designing optimized data models and REST APIs for JSON data exchange.
- Implemented role-based authentication and authorization workflows to tighten system security and user access control.

Software Developer — Ciatek IT & Software Solutions *May 2024 – Aug 2024*

- Developed REST APIs with Python (Django Ninja) to synchronize WooCommerce data with internal systems.
- Delivered a responsive web application using React.js, Vite, TypeScript, and Tailwind CSS.
- Implemented structured error handling and logging pipelines to improve application stability and API tracking.

IT Operations Analyst — Bank Audi, Lebanon *Oct 2023 – May 2024*

- Provided end-user and infrastructure support, resolving complex hardware and software incidents to maintain operational uptime.
- Administered enterprise IT infrastructure and secure remote access environments utilizing FortiSIEM, PuTTY, and Active Directory.

PROJECTS

CommuTech — Civic Issue Reporting Platform (Final Year Project) | GitHub Repo Laravel 12 · React Native (Expo) · PostgreSQL/PostGIS · Pusher WebSockets

- Built a full-stack civic platform connecting citizens, field personnel, and municipal admins for real-time issue tracking.
- Implemented geospatial municipality detection using PostGIS (ST_Contains) and live map updates via Pusher WebSockets.
- Integrated role-based workflows, in-app messaging, and public status pages with QR-code issue lookup.

InventStock — Inventory Management System ASP.NET Core Web API, Next.js, TypeScript, PostgreSQL, SignalR, JWT

- Designed and built a full-stack inventory management system using ASP.NET Core Web API, Next.js (App Router), and PostgreSQL, modeling parts, suppliers, and stock movements in a normalized relational schema.
- Designed a signed-quantity stock movement ledger (In/Out/Adjustment) enabling real-time stock levels via a single aggregate query while preserving a full user-attributed audit trail.
- Secured real-time stock updates with SignalR and JWT, enforcing role-based authorization at the hub-method level to prevent staff from invoking admin-only operations.

EDUCATION

Bachelor of Technology in Computer Science (BTCS) — Antonine University (UA), Baabda *May 2026*

TECHNICAL SKILLS

Backend: PHP (Laravel), REST APIs, C# (ASP.NET Core – MVC & Web API)
Frontend: React.js, React Native, Next.js, TypeScript, JavaScript, Tailwind CSS, Vite, HTML5/CSS3
Databases: MySQL, PostgreSQL, PostGIS, PL/SQL, ER Modeling
DevOps & Infrastructure: AWS, Git, GitHub, Nginx, Pusher, Postman, Vercel

CERTIFICATIONS & LANGUAGES

Certifications: AWS Certified Cloud Practitioner; Google Foundations of Cybersecurity; Meta Intro to Front-End Development
Languages: Arabic (Native), English (Fluent), French (Intermediate)
